Search Term Report

Use the Search Term report to see which customer searches triggered your ads for the past 60 days.

This report provides visibility into the actual search terms entered by customers searching on Amazon.com, and the impressions, clicks, and conversion data for your ads. This report contains search terms which generated at least 1 click on your ad.

Note: The Search Term report will be available when your campaigns have been running for at least one day.

How to use this report

Use this report to identify high performing customer searches for your ads that can increase campaign performance.

Here's how:

- Identify high performing customer search terms.
- Add these high performing terms as keywords to the appropriate ad group and consider adjusting your bids to increase impressions.
- Monitor performance and adjust to meet your business goals.

What's the difference between a "customer search term" and a "keyword"?

A customer search term is the exact set of words a customer enters when searching for a product on Amazon. A keyword is the word or set of words you bid on in Campaign Manager to target your ads to customers.

分析思路：

查看click是否集中单个或者几个搜索词或者属性上

搜索词（属性）对应的点击基数足够（70-100+）情况下，是否产生了订单，转化率是否达到预期（3%以上）

从曝光量大小，转化率高高低，也能找到挖掘放大或者缩小投放的切入点

点击基数越大，转化次数越多，词的价值越大
