- 2787. Twitter option to create folders for your messages.
- 2788. Ability to filter films on Netflix by rating (G, PG, etc.)
- 2789. An app that will randomly set off an alarm during all hours to better prepare you for having a kid. To turn off alarm you must sing a lullaby.
- 2790. Book Depository should have a feature where you can chat to other users viewing the same book in real-time. Be great to talk to other people about the author or previous books you read etc.

- 2791. Karaoke app, think of it like group facetime with music and lyrics.
- 2792. A gym that reduces your monthly fee based on how frequent you go.
- 2793. Netflix should have an "I'm feeling lucky button."
- 2794. A voice-activated kitchen tap.
- 2795. A WhatsApp feature that notifies you when someone opens your message.
- 2796. An app where you can color pictures with your friends.
- 2797. Undo delete option on iPhone Mail.
- 2798. An app that ranked restaurants/bars/coffee shops by how air-conditioned they are.
- 2799. On-demand ATM service for when you need cash.
- 2800. An app to diagnose vehicle engine noises.
- 2801. An iPhone feature where Siri screams when you drop your phone.
- 2802. A monthly subscription service where someone collects your makeup brushes and cleans them.
- 2803. An app that reminds me to respond to texts I've read.
- 2804. An Instagram feature where you can sync your desktop to live stories. Be great to share design/ programming tutorials in real-time. Think of it like SkillShare/ Udemy but for stories.
- 2805. A service where I can verify the price of car spare parts.
- 2806. iPhone feature where it will send you a notification if an app has been detected using the camera without you knowing.
- 2807. Twitter shows followers/ following, they should also show how many times you've been blocked/ reported. I feel this would make users think twice before trolling/ abusing someone. You would have the ability to toggle its public visibility on and off.
- 2808. YouTube edit feature that suggests music tracks to your video uploads.
- 2809. A heat-color changing pan handle
- 2810. Kids scary shampoo bottle that makes a sick noise when you squeeze it.
- 2811. iPhone feature where If you're on 1% battery Siri says "help me I'm dying" .
- 2812. A FaceTime feature where you could turn on/ off subtitles.
- 2813. Twitter feature (optional): if you upload a new Twitter profile photo it will create a new tweet with the photo and the #newprofile.
- 2814. A non-profit that has access to fruit trees on people's property. They would pick the fruit at the right time and then use the fruit to feed the homeless.
- 2815. A way to mute the Vuvuzela when watching the World Cup on TV.
- 2816. An option to make certain tweets private that only other users with the code could unlock to view.
- 2817. A Twitter feature where I could toggle retweets on and off on my timeline so that I could actually read tweets from the people I follow.
- 2818. Alexa skill called 'Dress Code' . It will let you know what to wear depending on where you're going.
- 2819. An app where you cough into your phone and it tells you what type of cough you have.
- 2820. Natural peanut butter jars should come in short, extra-wide jars to facilitate easier stirring.
- 2821. A trading app like Tinder where you trade items like furniture, phones, and other things.
- 2822. Farmer's market drive-thru.
- 2823. Netflix should allow profiles to be private.

- 2824. A robot that would rack your weights for you.
- 2825. Location-based music playlists. A music app feature that would suggest different playlists depending on where I am. If I'm in the office — chill playlist, if I'm at the gym — Hip Hop/ Rock etc.
- 2826. Every receipt should have a QR code so you can scan it, record the transaction securely, then throw away the paper bit.
- 2827. Outdoor children's games synced to their phone. The more time the kids play on the outdoor games the more time they can spend on their phone. #balance
- 2828. Fat cats app. A game where you play against your friend. The idea is you feed your cat with money. The more active/steps you take the more your cat feeds and the fatter it gets. You can bet money to see who has the fattest cat at the end of the week/ month/ year. The app can sync with your wearable device.
- 2829. Shazam for fonts.
- 2830. iPhone should be able to turn back on as soon as I plug it into the power outlet instead of having to wait 5 minutes.
- 2831. Politicians should get a small shock if they dodge a question on live TV.
- 2832. Alexa should only respond to children if they say "please" or "thank you" . Emergency calls override the restraints.
- 2833. Connect cyclists with drink drivers. The cyclist would cycle to the person's location/ put their bike in the car and drive them home.
- 2834. When your hands are full ask Siri to scroll up or down by voice.
- 2835. Should be a "no wifi needed" category in the app store.
- 2836. An app that alerted you when the gym machine you're waiting for becomes free.
- 2837. Shazam should have a feature that lets you know you've already Shazamed a song so you don't repeat yourself.
- 2838. An app where you scan a photo and it lets you know what app and filters were used to edit it.
- 2839. iPhone feature that if another iPhone user is in the same room as you and a phone rings, your iPhone will tell you if it's you or not "David, it's you ringing."
- 2840. On-demand service pregnant women that delivers them anything they are craving.
- 2841. Smart Fridge that closes itself, rather than playing a loud annoying alarm until it's closed manually.
- 2842. An e-mail service that detects Out of Office status and asks if you still want to send that e-mail.
- 2843. Motion-activated sinks that don't turn on until at least 5 seconds after the soap has been dispensed.
- 2844. Windows that quickly become opaque when detecting a bird is flying towards it.
- 2845. A shower device that sets the correct blend of cold and hot water for people in your house and then slowly turns on cold water when you've been in the shower for more than a set time.
- 2846. All household appliance should have a QR code which, when scanned, would lead straight to the manual download page.
- 2847. An app where you can type in what gym you go to and all the people who also go there pop up and you can choose your partner.

- 2848. An app that automatically fills airport wifi sign up with a dummy email address when you go to log in.
- 2849. Hazard lights that change a different color depending if you wish to signal others you' re turning left or right.
- 2850. Radio stations that play progressively more upbeat music as traffic conditions get worse.
- 2851. A site that automatically assembles videos of public events from social media and edits them into a single multicamera viewable experience.
- 2852. iPhone feature built in style of tinder to delete photos.
- 2853. An app where you can customize a voodoo doll and then interact with it.
- 2854. An app that tells you where the nearest McDonald' s that has a working ice cream machine.
- 2855. A charger that stops charging when your device is fully charged.
- 2856. A little lightbulb on our house keys, showing if the house is locked or not.
- 2857. iPhone feature where if you hold down the decline call, it gives you the option to immediately block the caller.
- 2858. A TI;DR Slackbot that summarizes all messages that you missed while offline.
- 2859. A LinkedIn filter that auto-blocks any non-custom connection request.
- 2860. Dynamic jewelry that reconfigures itself to suit your location.
- 2861. iPhone feature that shows me how many km my fingers has swiped every day.
- 2862. An app that edits out sirens and horn honks in music when played in your car.
- 2863. A bot which reveals who everyone is subtweeting.
- 2864. A bathroom mirror that takes selfies for you.
- 2865. Hotel review site that lists verified WiFi download speeds.
- 2866. Save to drafts option on the Twitter desktop. Why is this not a thing, they have it on the mobile app?
- 2867. AR labeling points of interest, towns, etc. built into the airplane window so you know what you' re looking at with touchscreen interaction.
- 2868. Headphones that instantly pause the source when you remove them.
- 2869. Holographic children that run onto the road when the system identifies a speeding car.
- 2870. An Amazon feature that posts random presents to you. Select the amount of money that you would like to spend, then it randomly picks items from your cart, or a list of products, and ships it to you. Receive a lovely surprise in the post each month.
- 2871. WhatsApp feature to save audio messages to your phone.
- 2872. Amazon Alexa that can detect boredom and come up with trivia challenges for you in real time.
- 2873. Google search results should block sites that make you subscribe in order to see the article.
- 2874. The ability to donate the collective number of minutes between when a conference call is scheduled to begin and when a conference call actually begins to charity.
- 2875. A shower head that doubles up as a microphone. Synced via Bluetooth with an app so you can share your singing with friends.
- 2876. A " Stop showing me this product" button on advertisements.
- 2877. A chat app for new parents out there who are awake during the late shifts.
- 2878. Smart directional fire sprinklers that drenches people who smoke in nonsmoking areas.

- 2879. An elevator that when empty will go to the floor with the most people near the button.
- 2880. Coupon & shopping list app that sorts items by store layout to minimize back-tracking.
- 2881. Windshield wipers that shake themselves to remove ice build up.
- 2882. Smart Pill dispenser synced with a smartphone app for the elderly. Vibrates phone when pills dispensed. Family can check status remotely.
- 2883. An iWatch app that understands your Sleep Cycle and shuts down the entire house (lights, tv, phone, door locks, garage door, etc.) into sleep mode when you cycle into a deep sleep! On wake, your coffee machine starts.
- 2884. Spray on nail varnish.
- 2885. A toilet that tests your pee and sends data to your phone for daily health recommendations.
- 2886. iMessage app that allows you to schedule messages for later.
- 2887. Engagement ring rental service.
- 2888. Color e-ink display on the reverse side of a laptop screen for digital stickers.
- 2889. A mobile browser that auto-clicks the tiny 'X' on pop-up ads.
- 2890. Clothing hangers with an e-ink display that tells you when the last time you wore that item of clothing. Also synced up to an app to tell you which item gets the least wear so you can give it to charity.
- 2891. A calendar that tells your colleagues what time slots you have free and also what time zone you' ll be in.
- 2892. An app where you take a picture of yourself and you receive a complete set of emojis with your face.
- 2893. iPhone Siri feature. A car app partnered with Siri where you can ask what the speed limit is while you' re driving or Siri will tell you to slow down.
- 2894. An alarm app connected to GPS that could wake me up from a nap before my bus stop.
- 2895. Headphones earplugs should be contrasting colors to differentiate between right and left.
- 2896. Smart traffic lights that trigger notifications on all nearby phones when they change.
"The light turned green, now is the time to put down your phone and drive."
- 2897. Machine learning app that correctly adjusts your friends arrival time when they say there,
"15 minutes away"
- 2898. Luggage that looks like giant sushi so baggage claim looks like a huge sushi revolving belt.
- 2899. Phones that can only be powered by the sun, a great way to get kids outside.
- 2900. Toilet seats that double as scales. Because they don' t lie, you KNOW you' ve been curious about your weight before and after!
- 2901. Bars should have an app where you can vote if the DJ should skip the trash song they' re playing, and if it reaches to 20% of the occupants at the bar they skip the song.
- 2902. A roommate locating service that matches based on interests.
- 2903. An audio-based dating app, where profiles contain no photos but just sound recordings of people describing themselves. For those of us very sensitive to sounds & words, this could be a powerful & novel way to connect people.
- 2904. An app for people with social anxiety that tells them where the bathroom is in a restaurant so you don' t have to bother the staff.

- 2905. An app like tinder but to find musicians to start bands with.
- 2906. An app that lets you rate your day and look for patterns that affect your mood.
- 2907. Convenience stores that get robbed should keep a bright colored spray can under the counter and use it like pepper spray. The bright color will help police find the culprit.

- 3037. A gym for the eyes, offering ocular gymnastics, or eye yoga, to tone and relax eye muscles for improved eye health.
- 3038. A smart mouse with sensors to monitor health indicators, such as blood pressure, glucose levels, heart rate, stress, sweat, and movement, that can detect disease patterns and provide notifications for lifestyle adjustments.
- 3039. A music app tool that matches playlists to the user's heartbeat, recorded via smartwatch, to personalize their exercise experience by adjusting the music's tempo to their pace.
- 3040. Include road condition details in Google Maps.
- 3041. A service that generates a virtual reality representation through photographs of

cherished memories that you want to preserve.

- 3042. A bedtime tradition for families where all members gather and share their cherished memories of the day through taking turns to reflect.
- 3043. A website/app that provides a list of movies using a specific music input, or recommends similar soundtracks.
- 3044. An AI-powered movie generator that produces a complete blockbuster film from your script or plot outline
- 3045. A platform that collects headlines from various news sources on a particular topic or event and presents them in a collage format.
- 3046. A bed that gently shakes you awake, instead of a traditional alarm clock, to encourage you to get up and start your day.
- 3047. A WhatsApp feature that tells you the audio recording stopped so you don't spend 10 mins wasted.
- 3048. Vaping with steam inhalation to relieve cold symptoms.
- 3049. A digital ring and water bottle pair that reminds the wearer to drink with a vibrating pulse, stopping only when the bottle is touched.
- 3050. AI tv that can add any language voiceover
- 3051. The option to rate any location on Google Maps based on its breathtaking factor.
- 3052. A kids toothpaste that transforms into a sweeter taste the longer they brush their teeth.
- 3053. Glow-in-the-dark storybooks that bring bedtime tales to life.
- 3054. A speed-dating app for investors and startup pitchers that connects them randomly through a chat-roulette style platform, giving them 30 seconds to interact and potentially make a match.
- 3055. Book vending machines. With each book, you would get the digital version.
- 3056. Upload a photo of yourself and find how many online pictures you are the random person in the background.
- 3057. A book site that lists all the books recommended in a book by the author.
- 3058. A Shazam-style app for movies, TV shows, spoken word, or any audio recording!
- 3059. A location-based app that allows users to ask others questions within a specified area.
- 3060. Tea bags that change color to indicate when your tea is suitable to drink.
- 3061. An app that can convert a YouTube playlist into an Apple/ Spotify playlist.
- 3062. An app where people pay for your spot in line at an event.
- 3063. Truth Day: The opposite of April Fool's Day where everyone agrees to be honest and straightforward in communication.
- 3064. An app where you type in your graduation year and it shows you a list of things science has since found to have been falsely taught when you were in school.
- 3065. Chrome extension that detects AI-generated text on Twitter and other platforms, with a reporting feature for suspicious content.
- 3066. App that suggests convenient meeting points based on real-time locations of friends and customizable venue preferences.
- 3067. App that breaks down goals into manageable tasks with progress tracking and reminder features.
- 3068. A way to trigger my GPS system that only turns on when I reach a certain destination I'm not familiar with.

- 3069. Non-stick poop toilet surface made of easy-to-clean materials, with a built-in cleaning system or special cleaner.
- 3070. Toilet paper holders that alert you via phone message when it's running low.
- 3071. Polaroid app where photos don't appear til 10 mins later. Shaking the phone speeds up the process of developing the photo.
- 3072. Netflix app where if I'm watching tv with subtitles they appear on my phone in case I'm browsing.
- 3073. A smart hoover head expands or reduces itself depending on the space it has to fit in between.
- 3074. Movie ticket prices should reflect a film's popularity.
- 3075. A hose equipped with a small radar sensor that automatically adjusts the pressure based on the density of plants, such as flowers and bushes.
- 3076. Geo-tagged stickers that can be placed on any surface and tracked using a corresponding app.
- 3077. Popcorn should include a small packet of floss or toothpicks for post-consumption cleaning.
- 3078. A feature that allows you to link your streaming service accounts (e.g. Netflix, Hulu, Amazon Prime) to your social media accounts and filters out spoiler posts.
- 3079. A feature on Netflix that allows you to view a summary of the total time you spent watching TV shows and movies

- 3082. A smart fridge that tracks the expiration dates of your food and sends reminders to use up items that are about to expire.
- 3083. A virtual reality headset that allows you to attend live concerts and events from the comfort of your own home.
- 3084. A device that translates sign language into spoken words in real-time, allowing for better communication between hearing and non-hearing individuals.
- 3085. A way to self destruct all my social accounts after i pass away.
- 3086. Smart toilet with sensors and AI that adjusts the amount of water used for flushing based on the size of the waste.
- 3087. Toilet with built-in composting system for sustainable waste management.
- 3088. Children's toothbrush that vibrates or plays a song for two minutes of brushing.
- 3089. A virtual garden app that allows kids to plant, grow, and harvest virtual vegetables, and helps them learn about the process of growing food.
- 3090. A sleek, long, thin screen that fits under your TV, displaying fully customizable close captions text.
- 3091. On demand hotel maids that come to your house. I love the look & feel of the bed, how it's made, the sheets, lil chocolate, origami towel.
- 3092. Set up a small library at the bus stop where riders can borrow and exchange books while they wait.
- 3093. An app that not only provides delicious recipes, but also curates a personalized music

playlist for each one!

- 3094. An app that you can scan your junk items and instantly see how much money you can make by selling them.
- 3095. An app that helps people reduce their carbon footprint by tracking and optimizing their daily habits and activities.
- 3096. A subscription service that provides monthly deliveries of sustainable, eco-friendly personal care products.
- 3097. A platform that connects local farmers with consumers, allowing them to sell their fresh produce directly.
- 3098. Zoom feature that people get charged X amount of money if they go over their set time on a call.
- 3099. A PDF reader that saves your reading position and zoom level, syncing it across all devices for a seamless reading experience. No more scrolling and zooming to find your place – it's all automatically saved for you.
- 3100. Instagram feature that automatically generates captions and hashtags based on the content of a post, making it easier for users to create engaging and searchable content.
- 3101. LinkedIn feature that helps users identify and connect with potential mentors, based on their career goals and interests.
- 3102. Create an AI tool that can monitor crops and soil conditions, using sensors and satellite imagery, to optimize irrigation and fertilization, and predict yields and pests.
- 3103. Create an AI tool that can analyze large amounts of medical data and images, such as MRIs and CT scans, to identify patterns and diagnose diseases more accurately and efficiently than humans.
- 3104. A VR game that lets players experience different historical periods and cultures, and interact with the people and events that shaped them, in a highly immersive and educational way.
- 3105. AI that auto-converts my blog posts into a bite-sized twitter thread.
- 3106. WhatsApp feature to translate audio messages into different languages.
- 3107. Cars gas tank opening should be behind the rear license plate.
- 3108. USB-heated fingerless gloves, for the cold mornings at my computer.
- 3109. WhatsApp feature shows you the local time of the person you're texting.
- 3110. AI that scans all your social network accounts and deletes anything that could affect your chances of getting a job.
- 3111. Newsletter app. The app gives you an email in which you can sign up to newsletters. Keeps your email free and reduces the noise & distractions.
- 3112. An app where you upload a reference art picture & it tells you what colour paints were used and links to buy.
- 3113. A "hide pyramid scheme" option on LinkedIn posts or motivational posts.
- 3114. An app that tells you how busy local playgrounds are.
- 3115. Ice cream truck but for coffee – a coffee truck that would drive around your area at a set time.
- 3116. An app that automatically records your achievements in work which could be used for monthly reviews or promotion requests.
- 3117. Sound-to-text ai glasses. The ai glasses would be able to tell what the sound is and

understand situations such as – approaching vehicles, person shouting, phone ringing, doorbell, alarm and many more.

- 3118. AI dream to image app. Whenever you wake up you would quickly out loud describe your dream. The app would then convert it into an image.
- 3119. A collaboration design tool for architects. Ability to add along with the client every other person needed to build a house.
- 3120. An app that can convert any cloud shape into a real-world object in real-time.
- 3121. A lazer cutting pumpkin machine.
- 3122. An apple feature to convert any message into audio when listening to your Airpods.
- 3123. An AI that could convert any voice recording to take the place of SIRI.
- 3124. Twitter feature to show how many people have reported an account. Maybe change the color of the account to red.
- 3125. Real-time view of your countries energy usage.
- 3126. Build a Dog rescue/ Retirement home hybrid. Both parties gain companionships.
- 3127. A light shade that looks like a helium balloon stuck to the ceiling.
- 3128. Washing machine that detects when a non clothing item is in the barrel and notifies you. Having not spotted a nappy within a bundle of clothes this would have been a life saver.
- 3129. A bowl that doubles up as a blender. Add all your porridge ingredients to bowl and then blend.
- 3130. WhatsApp feature to add captions to video messages.
- 3131. A music social network called EarBuds.
- 3132. Online platform where you can share highlights and quotes of a book you are currently reading.
- 3133. A stopwatch that shows money increasing while it runs to help keep you motivated at work.
- 3134. Netflix 'watching with parents' feature where it skips the sex scenes.
- 3135. Device to control your child's bike speed/ brakes
- 3136. Duolingo AI feature that would change random words from your favorite song into the language you're trying to learn.
- 3137. 24 hour disappearing tweet option.
- 3138. A hat that can adjust its tightness depending on the strength of the wind.
- 3139. WhatsApp feature to send a message within a group but hide that message from an individual group member.
- 3140. Wikipedia for datasets.
- 3141. Grammarly for Figma. A plugin that would give you real-time tips to improve your design.
- 3142. Launch a microphone into space. Anyone can listen in real-time.
- 3143. Create flushable baby wipes.
- 3144. Garbage disposal for your toilet which would guarantee nothing gets blocked.
- 3145. A wearable device that would detect when my body temperature got to warm and would automatically turn on my fan.
- 3146. An app for influencers to help take the best photo depending on what location they are in.
- 3147. A smart remote that makes a noise when you say "find remote!"

- 3148. An iPhone feature where if you add someone's number all of their social handles pop up and ask if you want to follow them.
- 3149. iPhones should let us set an alarm – Warn me when my battery has X mins left before it dies.
- 3150. A kid's toilet with a whack-a-mole style flusher.
- 3151. An app where I can group buy local services with my neighbors.
- 3152. An app to vent for people who were struggling and needed an outlet. One person vents and listeners could only listen, no chat, no nothing. Just listen.
- 3153. Alarm clock projector. The alarm clock would project a beautiful sunrise with the associated noises.
- 3154. A Twitter/Instagram 'follow random account' button that would follow an account based on your engagement.
- 3155. A problem to help with blank canvas fear. You simply tell the tool what you are looking to create, i.e a drawing, a poem, a book. The tool will then give you a one-liner to help start the creativity.
- 3156. Recycle old clothes into punching bags.
- 3157. A vape that doubles up as a stylus pen.
- 3158. A Dall-E app that you can scan text with and it will create AI-generated images. Could be very interesting with fiction books.
- 3159. A service that creates physical art in any medium from any digital art.
- 3160. YouTube should auto hide videos you have watched.
- 3161. Google maps should have a pot hole alert feature.
- 3162. An app that converts lego models into real world objects.
- 3163. Reverse of above. Turn photos of 3D lego objects.
- 3164. An app that every day gives you a concept with a 24h limit to create a drawing, photo or a short piece of text around the concept.
- 3165. A microwave while on gives you short facts about topics you want to learn more about.
- 3166. Charity websites should show exactly where your donations are going. i.e 80% charity 10% marketing 10% salaries.
- 3167. A healthy protein fortune cookie.
- 3168. Kinder egg bath bomb that has a fun lil toy inside.
- 3169. A way to see your friend's targeted ads so I know what to buy them for their birthdays.
- 3170. Erasable tattoo ink. An ink that breaks down when exposed to intense UV light.
- 3171. Temporary Tattoo printers.
- 3172. Dyson air purifiers should have an alarm that warns you when air quality is bad.
- 3173. AI Glasses with built-in ad blockers. AI would remove any IRL ads.
- 3174. Spotify dating app which matches you with a partner that has similar music taste.
- 3175. A hybrid of a coffee shop & a library.
- 3176. GoHelpMe. A site similar to GoFundMe but you offer your help or volunteer depending on what they're trying to accomplish.
- 3177. An app which allows me to take a picture of a business card, the AI would then create a digital version.
- 3178. The cardboard within toilet paper rolls should be made out of flushable materials.
- 3179. Amazon should pick-up your old boxes when you get a new package.

- 3180. An alarm that only turns off after X amount of steps.
- 3181. A self-cleaning microwave.
- 3182. A walking app that would.
- 3183. SoundTracker. An app where you input any movie/ tv show to find the songs accompanied.
- 3184. Contact fish eye lenses.
- 3185. A version of Subway but you get to make your own sushi burrito.
- 3186. Why don' t electric cars have solar panel roofs?
- 3187. Minecraft amusement park.
- 3188. Fly swatter that makes the lightsaber noise.
- 3189. Instagram, but only still images. No reels. No stories.
- 3190. Ladder with the shape of feet to step on.
- 3191. A highlighter that you can only see with special glasses. A great way to highlight books without marking them.
- 3192. An edible skewer that comes in both sweet & savoury flavours.
- 3193. Doggy poo catcher that attaches to your shoe so you can slide under and catch.
- 3194. Reusable roll-on deodorant.
- 3195. Car windows that self clean when you lower them.
- 3196. Website to permanently swap your home.
- 3197. WhatsApp feature to trim your audio message.
- 3198. An app where I could write one review and it gets shared to all the places I want to publish – Amazon, goodreads, storygraph, etc.
- 3199. An app where people can share one song per day and you can also see your friend' s recommendations.
- 3200. AR origami app.
- 3201. Slippers with a clip on sole for outside use.
- 3202. Milk carton that changes color if the milk is spoiled.
- 3203. A 3D service that turns your children' s drawings into 3D objects.
- 3204. Social media feature to only allow you post X amount of times per day
- 3205. TV that follows you around your room.
- 3206. Soother changes color depending on how dirty it is.
- 3207. Cold/ Heat pack for the entire body (maybe a suit)
- 3208. Dyson garden leaf blower.
- 3209. An everlasting tea bag.
- 3210. Alexa feature that notices arguments and responds with calming words.
- 3211. Popular beaches should have sunscreen vending machines.
- 3212. An app to tell you your legal rights in certain situations. For example, if you' re being pulled over then you can review your legal rights for that scenario.
- 3213. Wikipedia for new and emerging ideas.
- 3214. A tool to convert Twitter threads into blog posts.
- 3215. A candle that smells like new books.
- 3216. A website where people can submit their websites for other people to rate and review.
- 3217. A website that shows you ratings of products or places over time.
- 3218. Your WIFI should auto reset when it detects no internet connection.

- 3219. An astrology dating app, where you can match people compatible with your natal charts
- 3220. A restaurant that allows you to dine with someone in another part of the world via a large screen & zoom.
- 3221. A bot that auto logs you in to your online meetings.
- 3222. I love the oats pringle style can but why don' t all cereal come in it too?
- 3223. An indoor flower pot that tells you if your overwatering or underwatering your flowers.
- 3224. A to-do list and social media hybrid. Buddies add activities to each other' s to-do lists and vote on what should be done first.
- 3225. A zipper that gives you a small shock if it' s open for longer then X amount of time.
- 3226. Brown bins should have a small feeding hatch for birds to feed on the maggots.
- 3227. A laptop that closes itself over when idle for X amount of time.
- 3228. An app that scans your food items and lets you know when the item is about to go off.

- 3543. A GMAIL feature to block all "Out of office" auto response emails.
- 3544. A browser plugin or app that allows users to screen record a broken app/site UI issue or error with details like device internet connection strength. Users upload recorded session to tweet link or submit it to the company to fix.
- 3545. An app where you take a photo of how a car is parked. An AI detects the license plate. You can only send the text "you park great/ terrible" . When someone registers with their license plate, they are shown all the feedback they got.
- 3546. An app that automatically links to your Spotify playlists for music when you' re put on hold by customer service.
- 3547. A collaborative playlist where you can add and upvote tracks to move them forward in the queue. You should not be able to skip the currently playing track. Backed by your favorite music provider such as Spotify.
- 3548. Subscription service that gives you a refrigerated box with vision sensors. You choose your items and then every time you want groceries you place the box outside your house and it senses it and a drone delivers your shopping directly to the box
- 3549. Wardrobe with a built in steamer. Help to kill bacteria and freshen your clothes.
- 3550. A simple todo app focused on tracking how long tasks took from start and finish to predict future task time estimates
- 3551. A service that was tied to my todo list and held me accountable for things I didn' t do that week. The service would give me an automated call / text telling me what I was missing & give me tips to catch up.
- 3552. America' s next top model but for Graphic Designers.
- 3553. A heated bike saddle for the cold days.
- 3554. A baby bottle that changes colour when it' s at the perfect temperature for feeding.
- 3555. Aroma alarm clock that releases a smell that starts off gentle but gets more pungent the longer you ignore it.
- 3556. Toothpaste should come in aerosol cans similar to whipped cream.
- 3557. A smart fridge that turns down the light when you open it at 2 am.
- 3558. An app where your goals are represented by flowers. The more you work towards your goal the quicker the flower will grow. Stop and your flower will wither and die.
- 3559. After Effects should suggest videos to watch within the rendering box.
- 3560. An app where you scan food and it will list the health benefits.
- 3561. Bed sheets should all have standardized markings to indicate the ends and sides.
- 3562. Car freshener that smells like freshly brewed coffee.
- 3563. Netflix feature that lets you create a custom queue of different TV episodes.
- 3564. Start a TV club where a few people watch a set amount of episodes a week of a series and get together to discuss.

- 3565. Mayo & ketchup squirt bottles that have nozzles on both ends.
- 3566. Bank Cards should use a QR Code to store information. The current contacts of the chip get damaged easily.
- 3567. A smart television that is smart enough to recognise that kids are watching too close and turns itself off
- 3568. Battery plug that unplugs itself from the socket after your device is fully charged.
- 3569. An alarm clock that gives away spoilers to your favourite TV shows the longer you sleep.
- 3570. Solar panel beach umbrella. Charge your phone at the beach.
- 3571. A smart microwave that automatically stops and stirs your food halfway through the power duration.
- 3572. Plastic spoons that you peel a cover off of and they are full of peanut butter or Nutella.
- 3573. A dating app synced with a wearable ring. When you' re in proximity to a match your ring glows brighter the closer you get.
- 3574. A website that connects cosplay with hospitals so they can visit sick children and cheer them up.
- 3575. Google Maps should have a safety rating for routes filter.
- 3576. IMDB scores should be integrated into Netflix.
- 3577. Marvel should create a CGI Stan Lee to keep the cameos going.
- 3578. An IMDB for startups. The ability to search for a startup idea and see if it' s been done before and if it was a success or a failure. Features such as team size, sales, insights are included etc.
- 3579. Free bus journeys with the requirement that you must watch ads for the entirety of your bus journey.
- 3580. An app where a random song would play that matches the amount of time it will take for me to get home.
- 3581. A time-delay capsule that contains 400mg of caffeine. Take it before you go to bed. 8 hours later it begins releasing the dosage.
- 3582. There should be a breathalyzer to show how sick you are. This would be fair to employers/employees alike. Measure amount of bile, pathogens in breath/blood
- 3583. Anyone who wants to buy a gun should have to get approval from a Psychologist before purchasing.
- 3584. Google map should have a 'noise level' filter for streets — can be helpful when booking a hotel (Pre-Corona Idea).
- 3585. Toilet paper rolls should be made out of flushable materials.
- 3586. A Chrome Plugin that removes Pinterest links out of all Google searches.
- 3587. Instagram should auto suggest hashtags based on what you' re posting about.
- 3588. Peloton for Wheelchair users. A great way for the disabled to join a community and still keep fit while indoors.
- 3589. An app where you can share anything and ask the users to roast it. Roast my photo. Roast my drawing.
- 3590. Tinder for racket games. Match with people to play different racket games involving two-player games – tennis, squash, badminton, beach tennis and so on.
- 3591. A car with a built-in drone camera. The camera can help you deal with blind turns, corners or curves.

- 3592. A cologne that smells like new books.
- 3593. A dating app called discovery. When you match with someone the app will choose a spot for you to meet. The only directions you will have will be given by a compass.
- 3594. Kids toilet called cookie monster. Every time you flush the toilet will scream "SNACK TIME" and make the cookie monsters eating noises.
- 3595. An app that every day gives you a concept with a 24h limit to create a drawing, photo or a short piece of text around the concept.
- 3596. Tinder to help couples decide on things. Each partner would add what movies, tv shows, places to eat, recipes to make, places to visit that they like. They would then swipe left or right on what their partner has added. A way to help couples decide on what to do.
- 3597. A water bed that gives the illusion you are floating on an inflatable at sea – seagulls, waves crashing and similar wave movements.
- 3598. Apple watch should have a blood glucose monitor feature.
- 3599. Netflix should create a subtitle feature to help you learn a new language. It would swap out a random word into the language you are trying to learn.
- 3600. Gun safes should have a breathalyser test. If you are over the level the safe won't open.
- 3601. An app that converts speech into sign language.
- 3602. Airpod cases should double up as a controller.
- 3603. Anti-social network phone that allows you to only post three times per day across all social networks.
- 3604. Onlyfans for chefs. You subscribe to a chef and get cooking ideas, recipes, videos etc.
- 3605. Windows that automatically open when they recognise smoke.
- 3606. Recipe chrome extension that extracts the actual recipe. No more endless scrolling looking for the god damn recipe.
- 3607. A candle that has that new book smell.
- 3608. An app that matches you to people who highlighted the same passages while reading.
- 3609. Hard reset app. Connect all your social accounts to the app. Once connected you can do a hard reset on all your followers or all your content or both. Start fresh.
- 3610. A light on your laptop that changes color depending on your wifi speed.
- 3611. An Netflix option to remove the laughing track on sitcoms.
- 3612. A service that provides custom jack-in-the-box.
- 3613. Charity boxing match between Elon Musk and Jeff Bezos.
- 3614. A text editor where Pac-Man will start eating the text whenever you press backspace.
- 3615. AI chrome extension for anxious people. You flag any posts that make you anxious across any social network. The more posts you flag the smarter the AI will become in auto-blocking.
- 3616. iPhone feature to assign different ringing levels to different people. i.e set my family & work too loud, all others to medium.
- 3617. A noise-cancelling toilet, so you don't wake your partner up at night or in the morning.
- 3618. A mini cement mixer that you can mix ice/drinks in.
- 3619. A recycling bin that compresses my trash allowing me more space to fill.
- 3620. Instagram feature to blacklist posts that use certain words or hashtags.
- 3621. An app that would allow you to sell multiple items on multiple platforms. Create one listing for each item and the app would post the item to ALL platforms (eBay, Amazon,

Facebook groups etc).

- 3622. Tinder for actors. Where fellow actors can meet and go over their lines together.
- 3623. An app where you can exchange unwanted Christmas presents.
- 3624. A microwave that won't turn on if it detects metal.
- 3625. Book club finder app. People get matched into a group based on their reading interests.
- 3626. iPhone feature called 'Fortune cookie'. When you break your screen a fortune cookie will pop up with some words of wisdom.
- 3627. Fruit that has stickers on them should sell space for another sticker as Adspace
- 3628. AI that dumbs down wordy eBooks into basic English.
- 3629. Flavoured lemon, lime & other fruit-flavoured ice cubes. You could add the cubes to your soft drinks or alcohol to enhance the flavour rather than the generic water ice cubes.
- 3630. Goodreads for Podcasts – A place to share, discover and track podcasts.
