

DIGITAL & TRENDS

Artificial intelligence (AI) in e-commerce

Table of Contents

01 Market size

- Technology sectors facing setbacks in securing AI deals worldwide 2020-2024
- AI spend as share of revenue in retail and consumer goods companies 2025
- AI market size in the luxury brands industry worldwide 2024-2034

02 Participation

- Adoption of generative AI across industries and functions worldwide 2024
- AI use in global enterprises 2025, by industry and function
- Retailers investing in specific AI areas worldwide 2025
- Brands leveraging AI to improve customer experience 2025
- Usage of AI/ML tools in e-commerce fraud management worldwide 2024

03 Demographics

- Consumers using AI assistants or ChatGPT when shopping online 2025, by generation
- Desired AI-assisted features in the buying process worldwide 2024, by generation
- Consumers perception about virtual shopping assistants 2024, by age
- Consumer trust in AI data privacy by generation 2024
- Gen Z' GenAI usage preference in the customer journey worldwide 2024, by stage
- Millennials' GenAI usage preference in the customer journey worldwide 2024, by stage

04 Consumer behavior

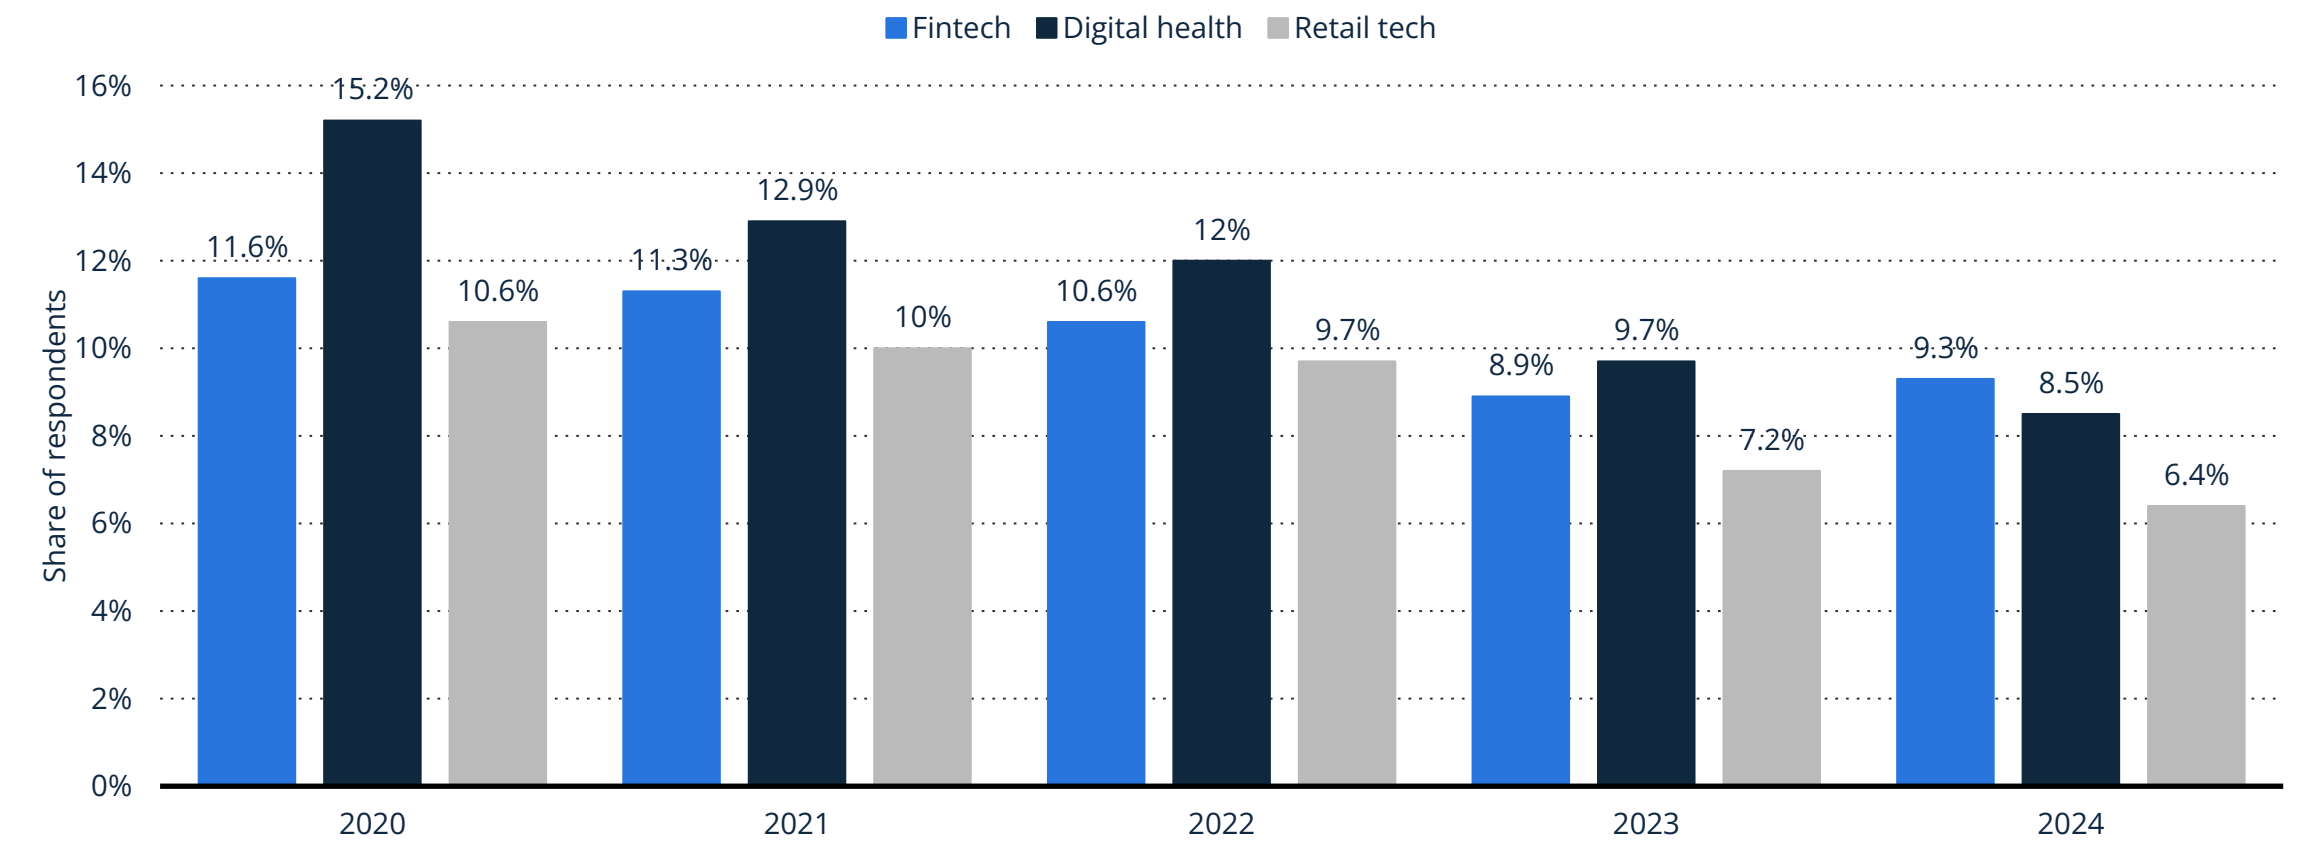

Generative AI use and awareness in online shopping 2025	20
Shoppers feelings on AI usage for shopping experiences worldwide 2025	21
Most desired AI shopping features globally in 2025	22
E-commerce user preferences for generative AI tools 2024	23
Frequency of using AI for making purchase decisions in European countries 2025	24
Consumers wanting GenAI to provide hyperpersonalized content in 2025	25
Chatbot queries in e-commerce 2024	26
Main reasons to use ChatGPT when shopping online 2025	27

CHAPTER 01

Market size

Share of AI equity deals worldwide in seleted tech sectors from 2020 to 2024

Technology sectors facing setbacks in securing AI deals worldwide 2020-2024

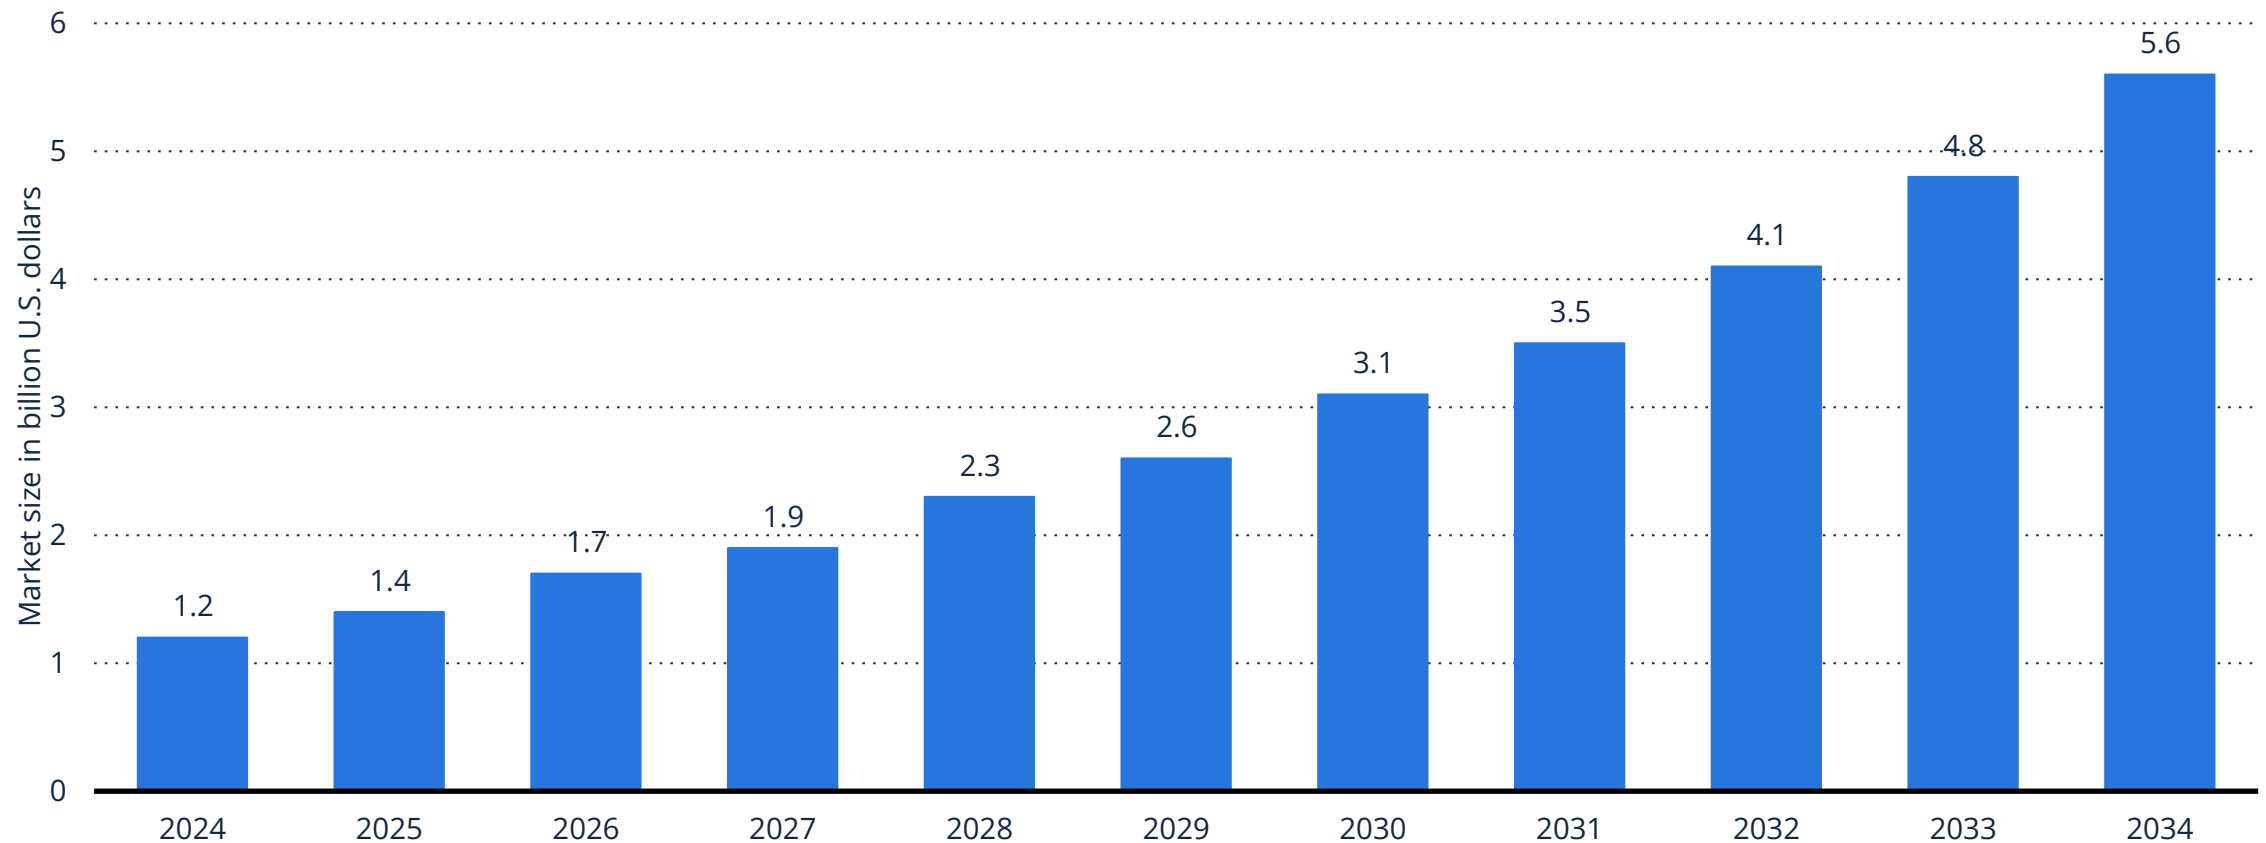

Share of annual revenue dedicated to AI spend in retail and consumer goods companies in 2025

AI spend as share of revenue in retail and consumer goods companies 2025

	IT spending	Outside of IT
Share of annual revenue to be spent on AI	1.04%	2.28%
AI spending growth compared to 2024	19%	52%

Size of artificial intelligence (AI) integration into the luxury brands market worldwide from 2024 to 2034 (in billion U.S. dollars)

AI market size in the luxury brands industry worldwide 2024-2034

CHAPTER 02

Participation

Global adoption of generative artificial intelligence (AI) across industries in 2024, by function

Adoption of generative AI across industries and functions worldwide 2024

Function	Technology	Professional services	Advanced industries	Media and telecom
Marketing and sales	55%	49%	48%	45%
Product and/or service development	39%	41%	39%	28%
IT	31%	16%	26%	22%
Service operations	30%	23%	24%	37%
Knowledge management	26%	34%	17%	28%
Software engineering	36%	9%	17%	30%
Human resources	16%	17%	13%	22%
Risk, legal, and compliance	12%	9%	6%	6%
Strategy and corporate finance	14%	14%	21%	10%
Supply chain/inventory management	10%	4%	15%	3%
Manufacturing	5%	3%	13%	3%
Using gen AI in at least one function	88%	80%	79%	79%

CHAPTER 03

Demographics

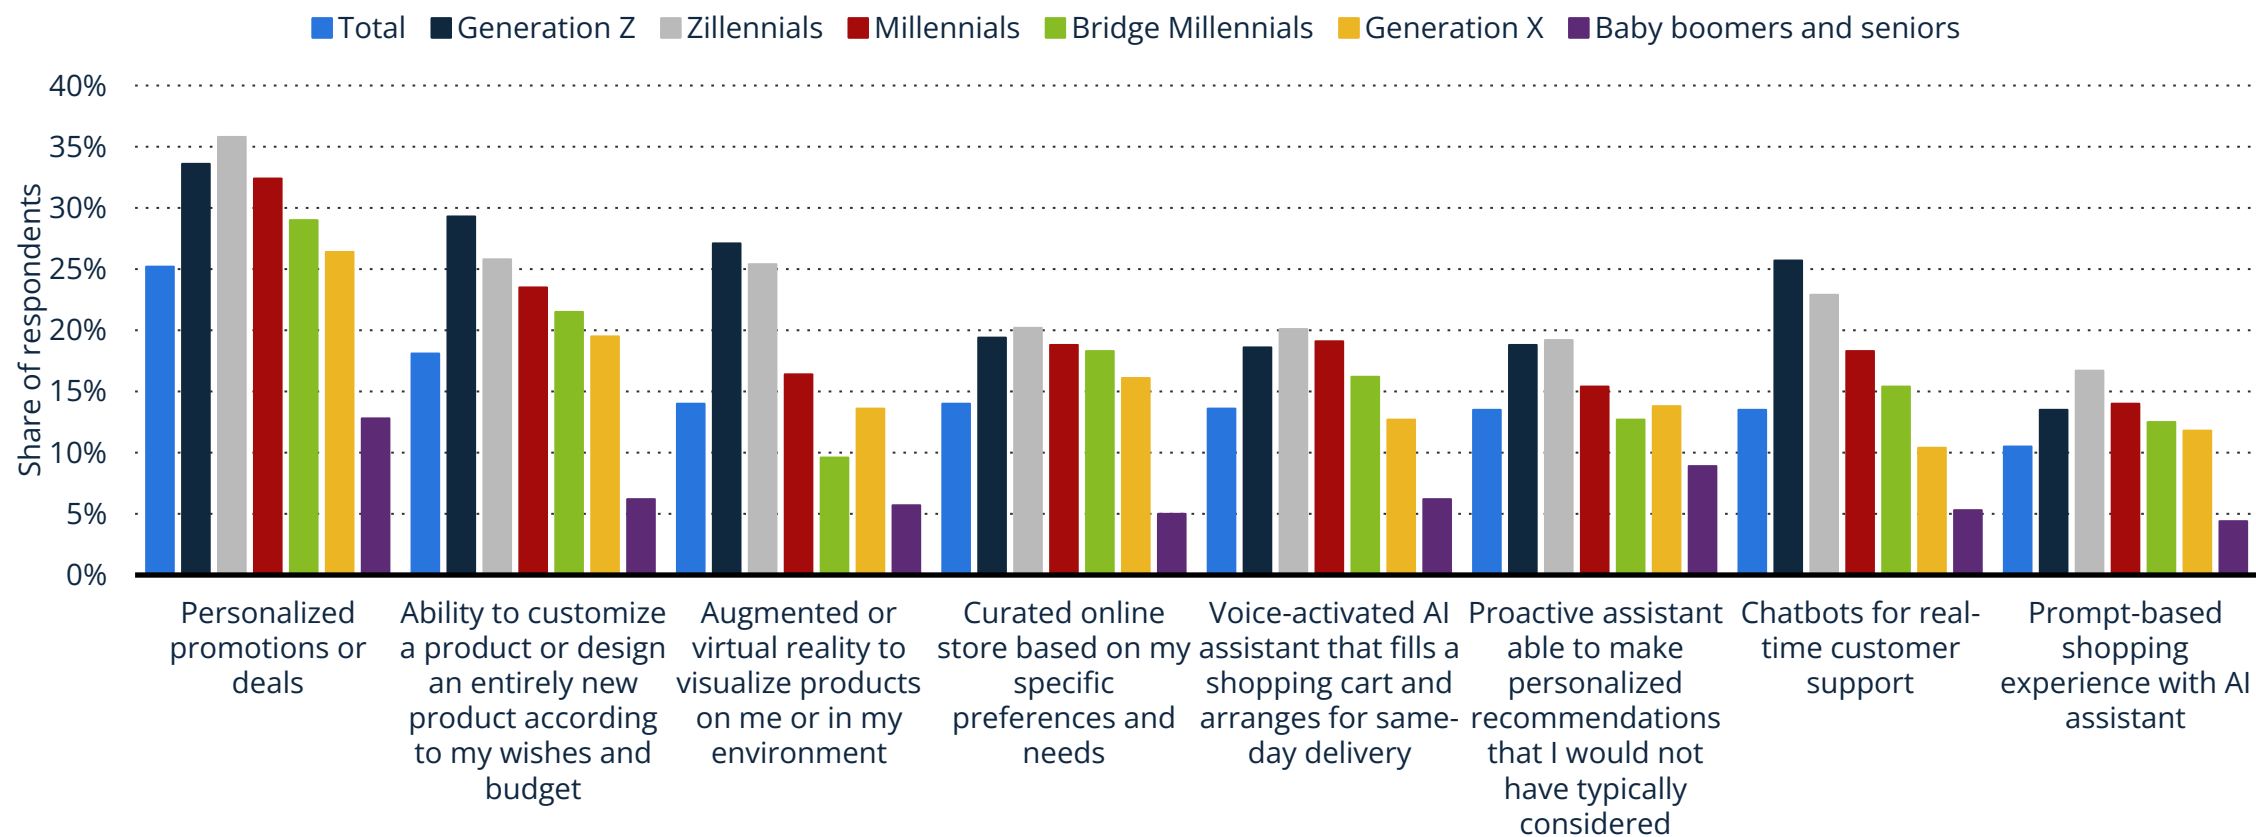

Consumers using AI assistants or ChatGPT when shopping online in 2025, by generation

Consumers using AI assistants or ChatGPT when shopping online 2025, by generation

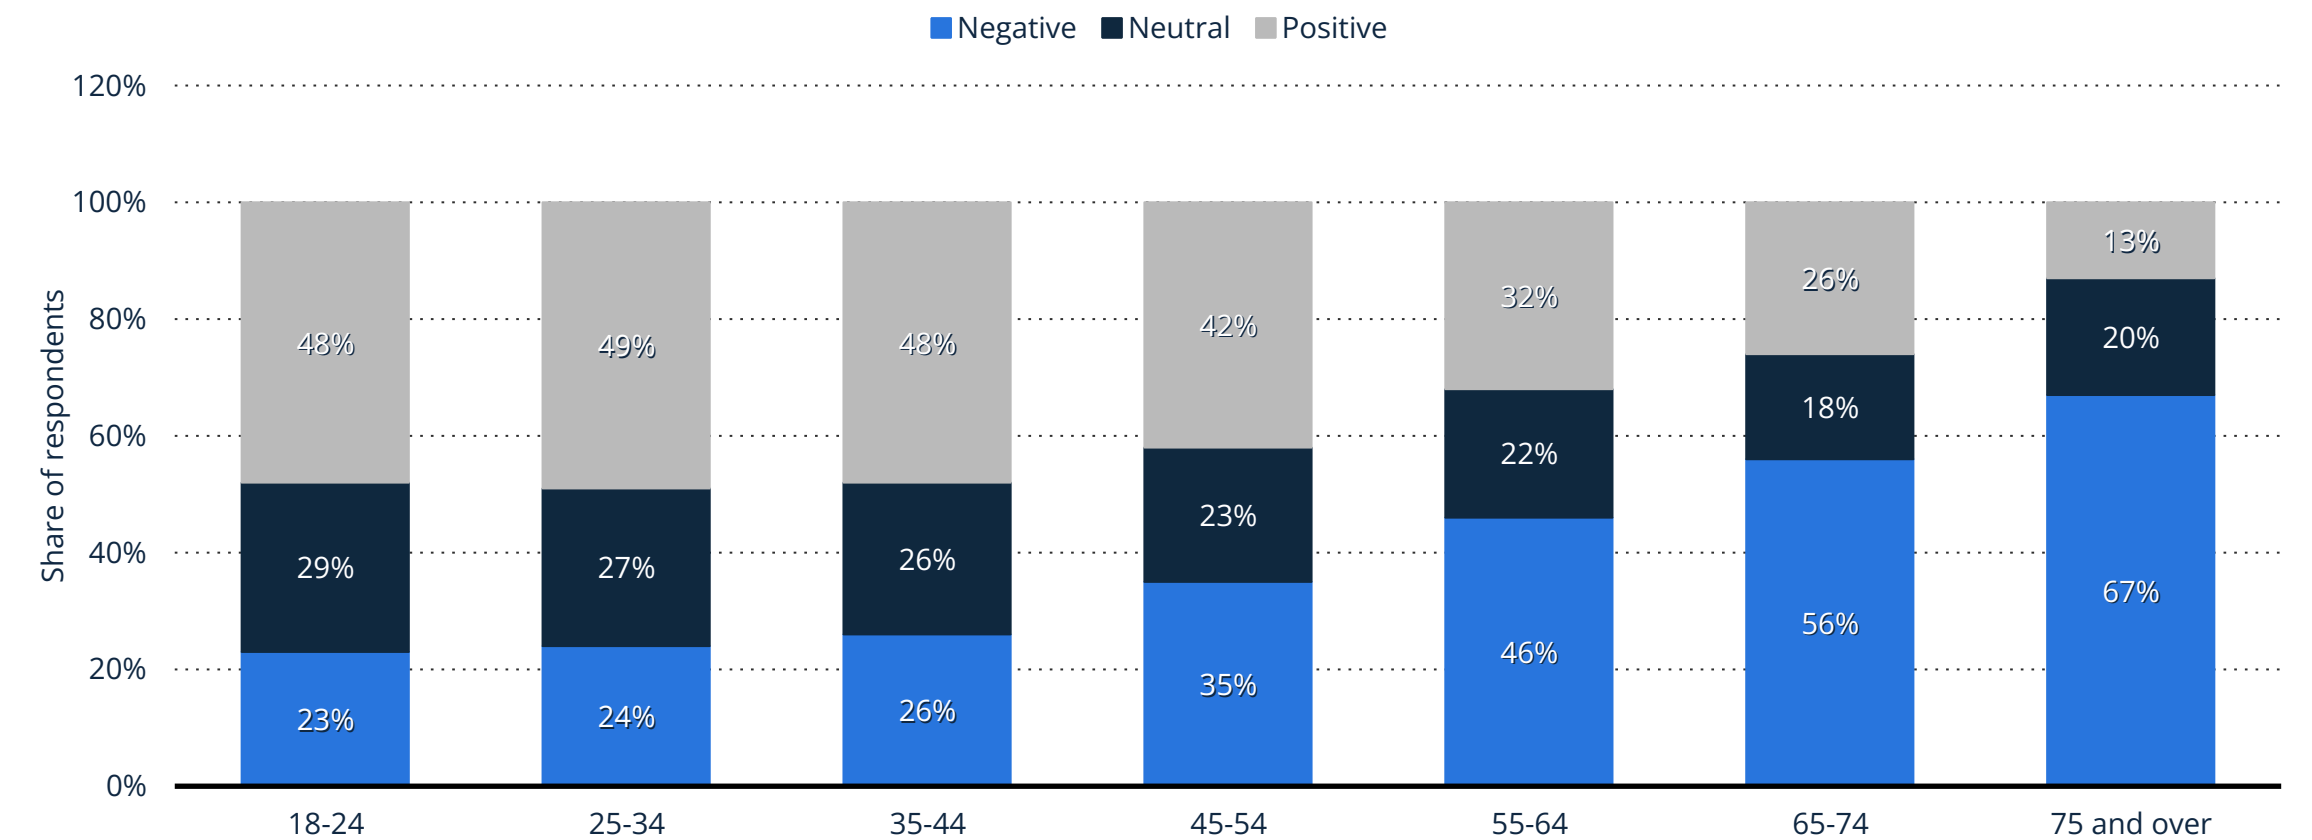

Share of consumers wanting selected AI-assisted purchase experiences worldwide in 2024, by generation

Desired AI-assisted features in the buying process worldwide 2024, by generation

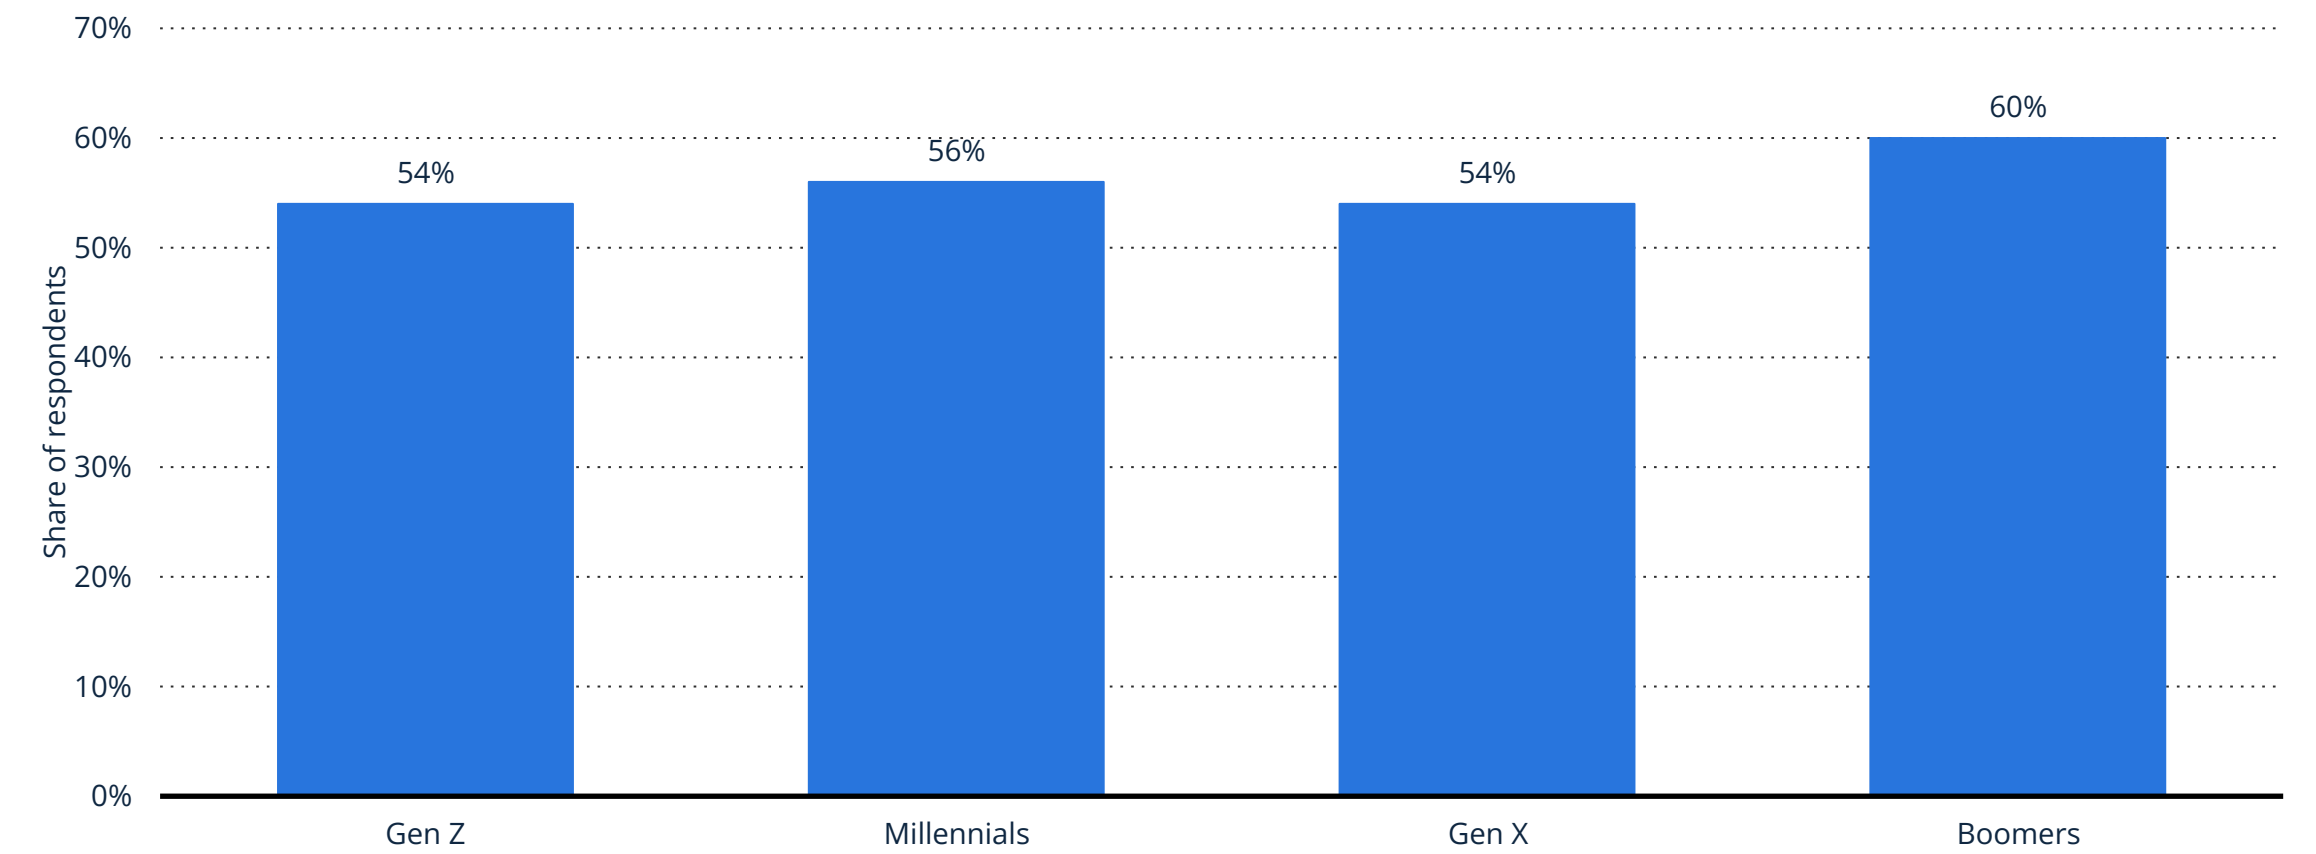

Consumers feelings towards virtual shopping assistants in 2024, by age

Consumers perception about virtual shopping assistants 2024, by age

Consumers trust in data privacy with AI technologies in 2024, by generational cohort

Consumer trust in AI data privacy by generation 2024

Share of generation Z consumers preferring the use of generative artificial intelligence (GenAI) in the purchase process worldwide in 2024, by stage

Gen Z' GenAI usage preference in the customer journey worldwide 2024, by stage

	Share of respondents
I want GenAI tools to aggregate all the product searches across online search engines, social media platforms and retailer sites to provide purchase options	60%
I am positively anticipating GenAI's ability to offer customized fashion and home decoration recommendations based on individual style preferences	44%
I am fine with GenAI tools/chatbots asking me specific questions about products I have purchased	47%
I want GenAI to provide hyper-personalized content and product/service recommendations based on the preferences of individual users	44%
GenAI recommendations are superior to in-store sales assistant recommendations	31%

Cropped Version

Double click to open excel file with complete data

Share of Millennial consumers preferring the use of generative artificial intelligence (GenAI) in the purchase process worldwide in 2024, by stage

Millennials' GenAI usage preference in the customer journey worldwide 2024, by stage

	Share of respondents
I want GenAI tools to aggregate all the product searches across online search engines, social media platforms and retailer sites to provide purchase options	67%
I am positively anticipating GenAI's ability to offer customized fashion and home decoration recommendations based on individual style preferences	65%
I am fine with GenAI tools/chatbots asking me specific questions about products I have purchased.	53%
I want GenAI to provide hyper-personalized content and product/service recommendations based on the preferences of individual users.	59%
GenAI recommendations are superior to in-store sales assistant recommendations.	35%

CHAPTER 04

Consumer behavior

Consumer awareness and use of generative artificial intelligence (Gen AI) in online shopping in 2025

Generative AI use and awareness in online shopping 2025

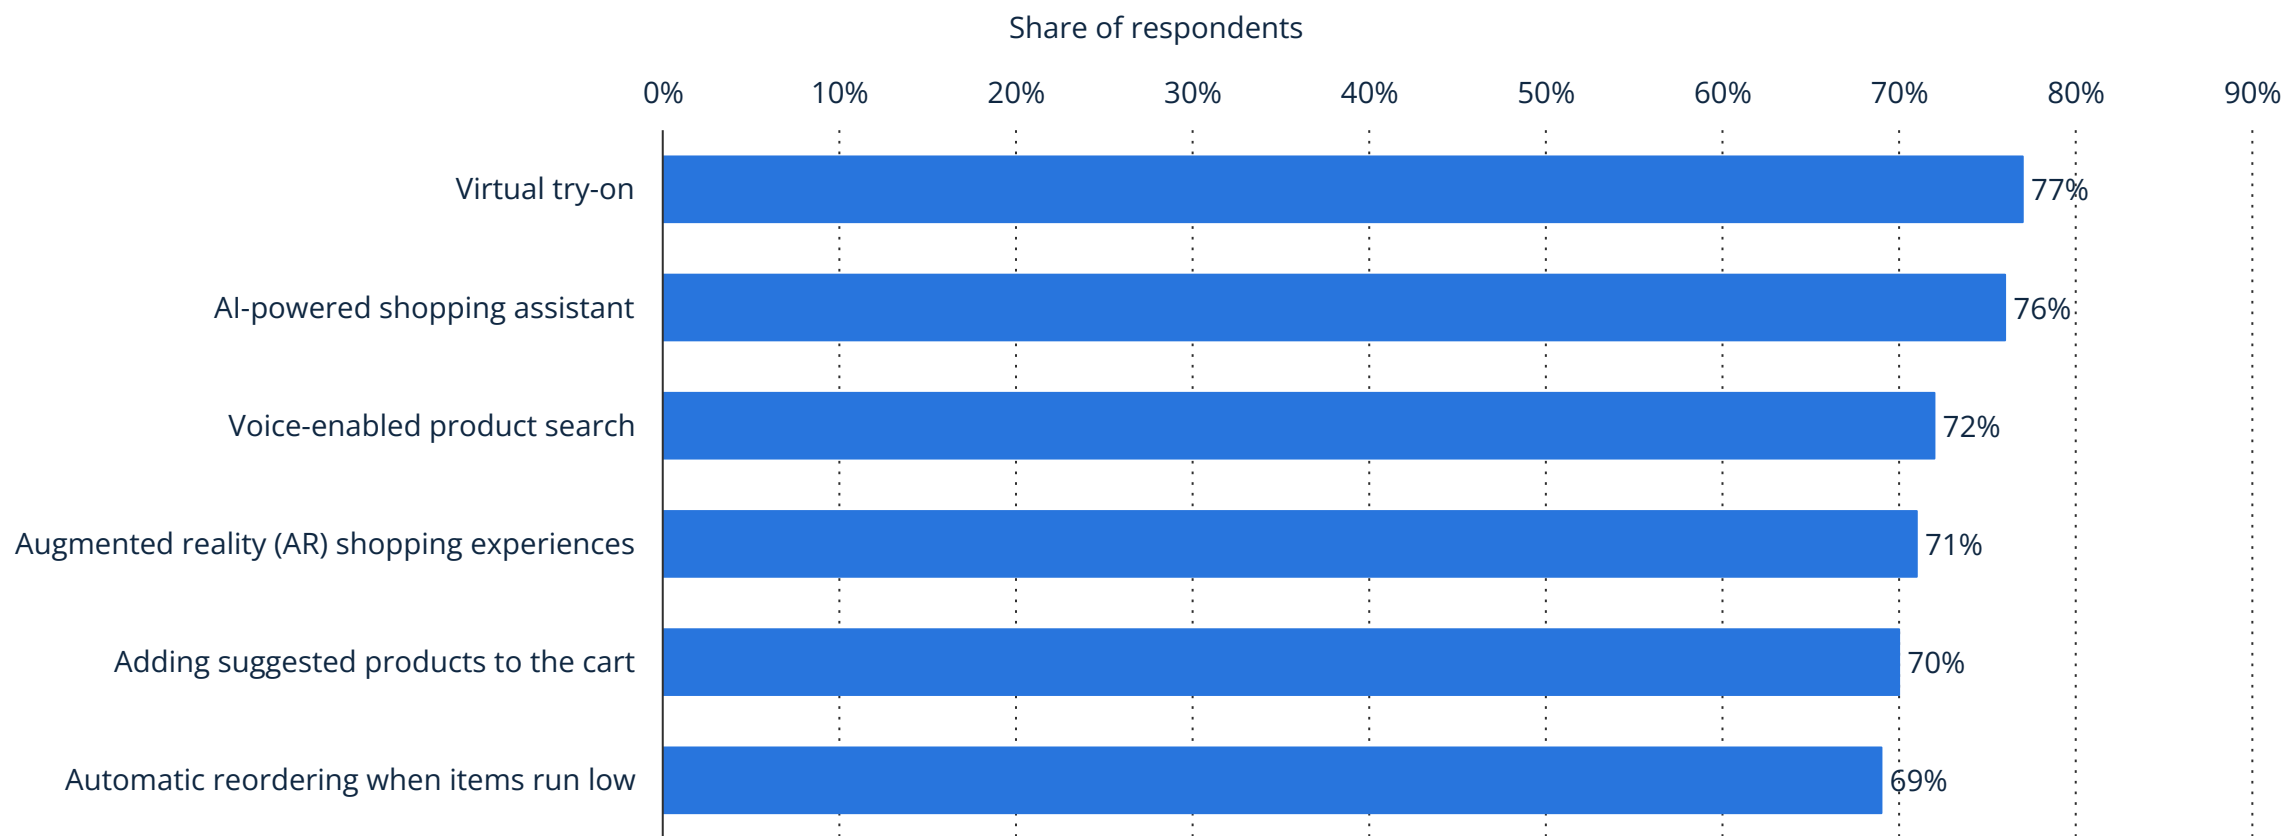

Consumers' sentiment over the use of AI in shopping experience worldwide in 2025

Shoppers feelings on AI usage for shopping experiences worldwide 2025

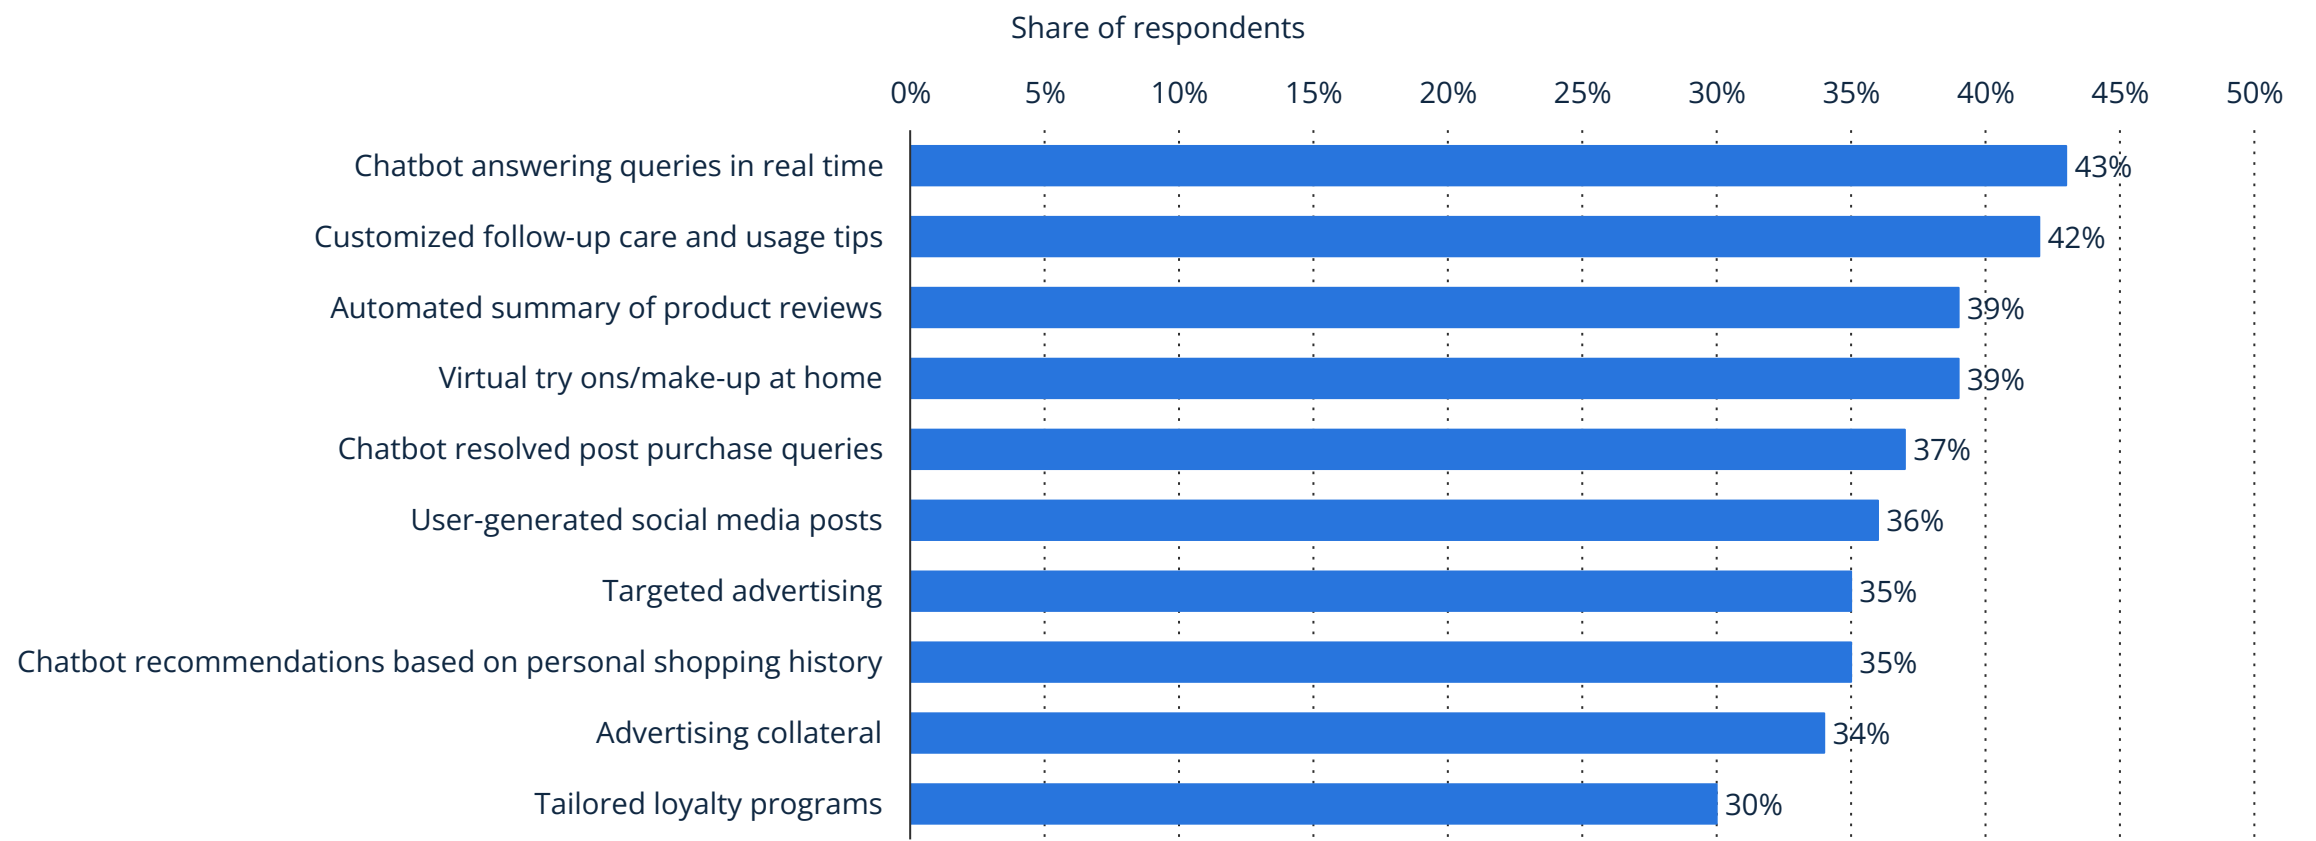

Most wanted AI shopping features worldwide in 2025

Most desired AI shopping features globally in 2025

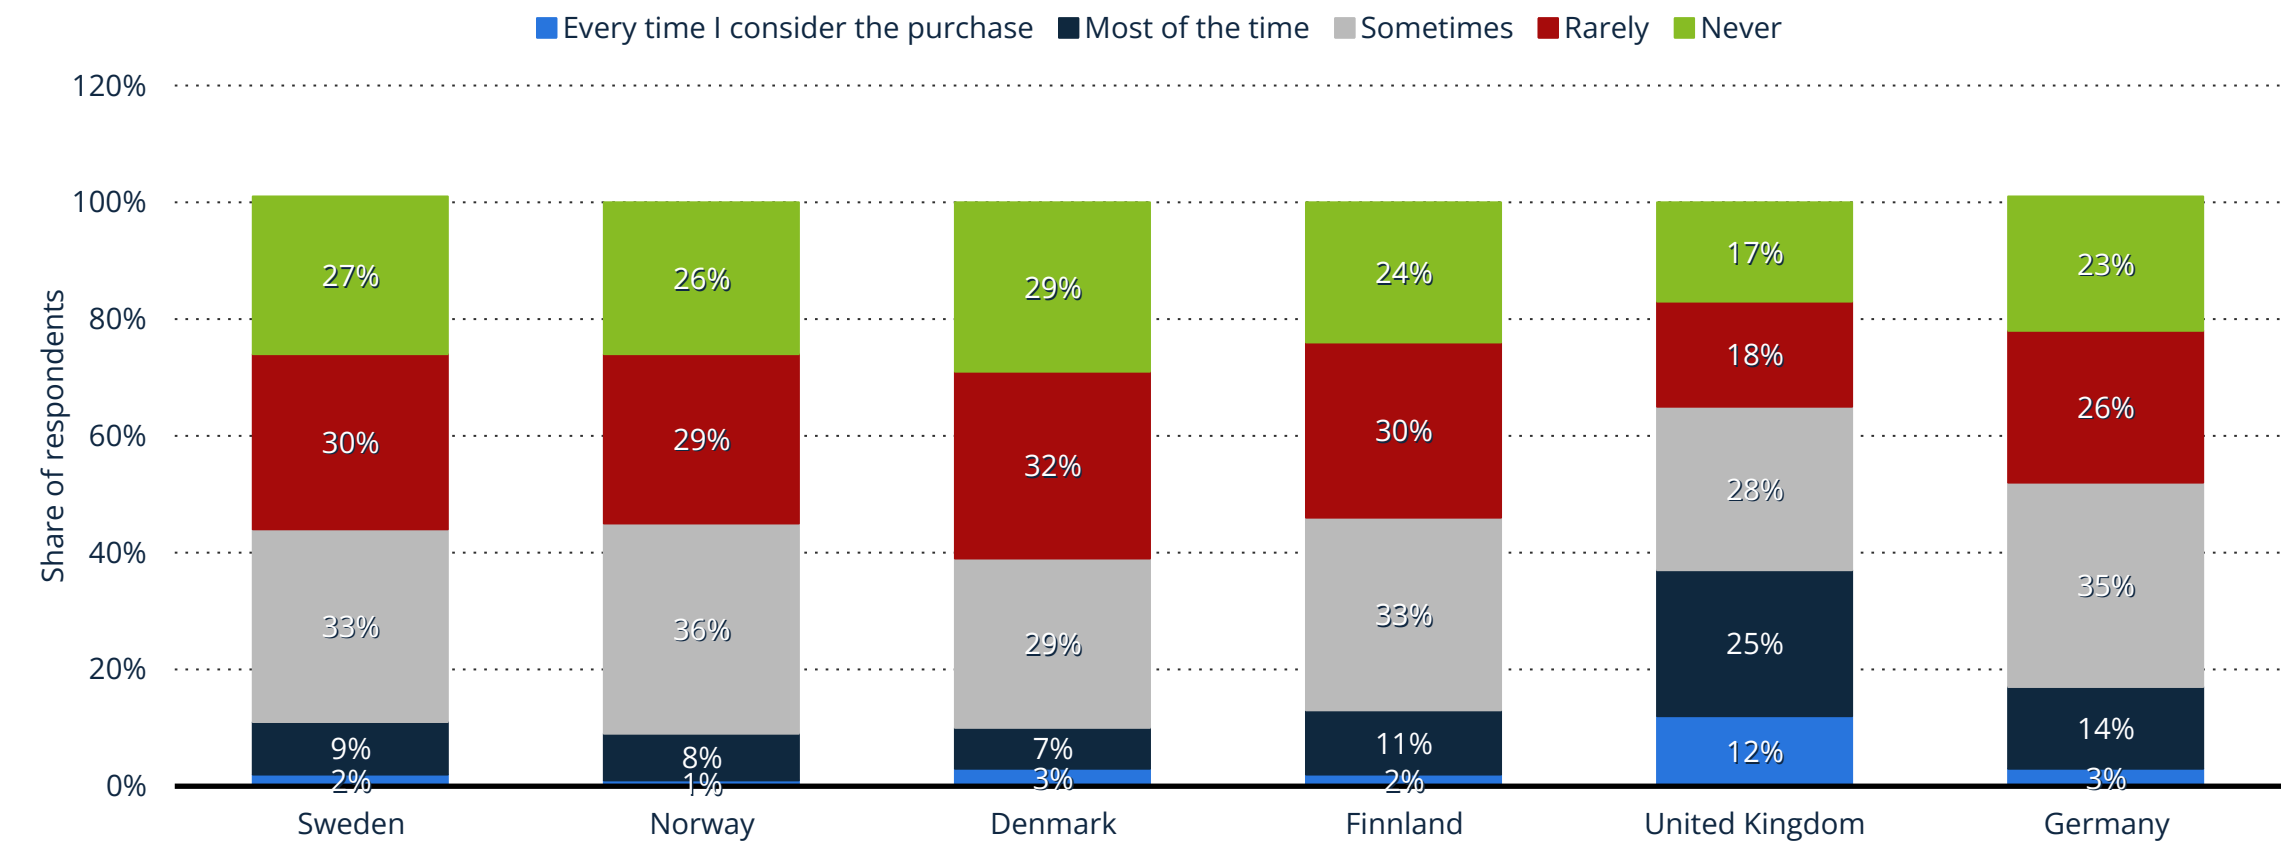

Consumer preference for generative artificial intelligence (Gen AI) tools in e-commerce in 2024

E-commerce user preferences for generative AI tools 2024

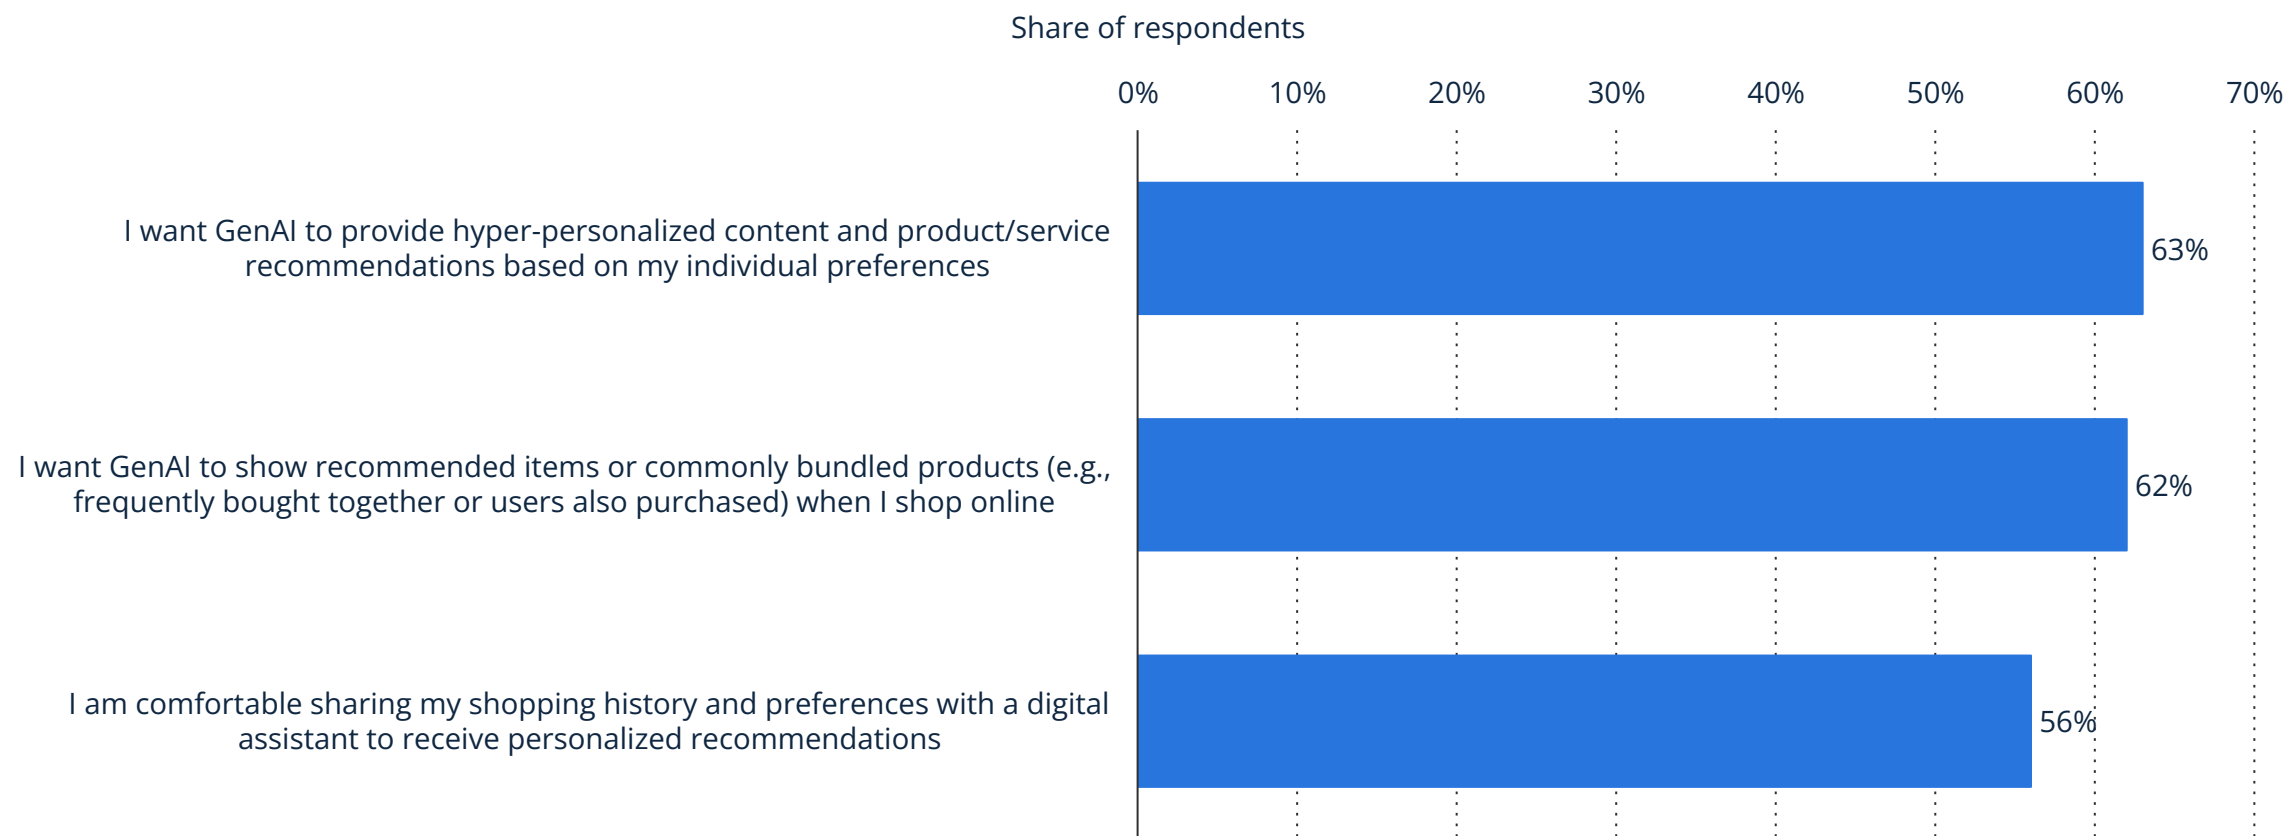

Frequency of using conversational AI tools in assisting making purchase decisions in selected European countries as of June 2025

Frequency of using AI for making purchase decisions in European countries 2025

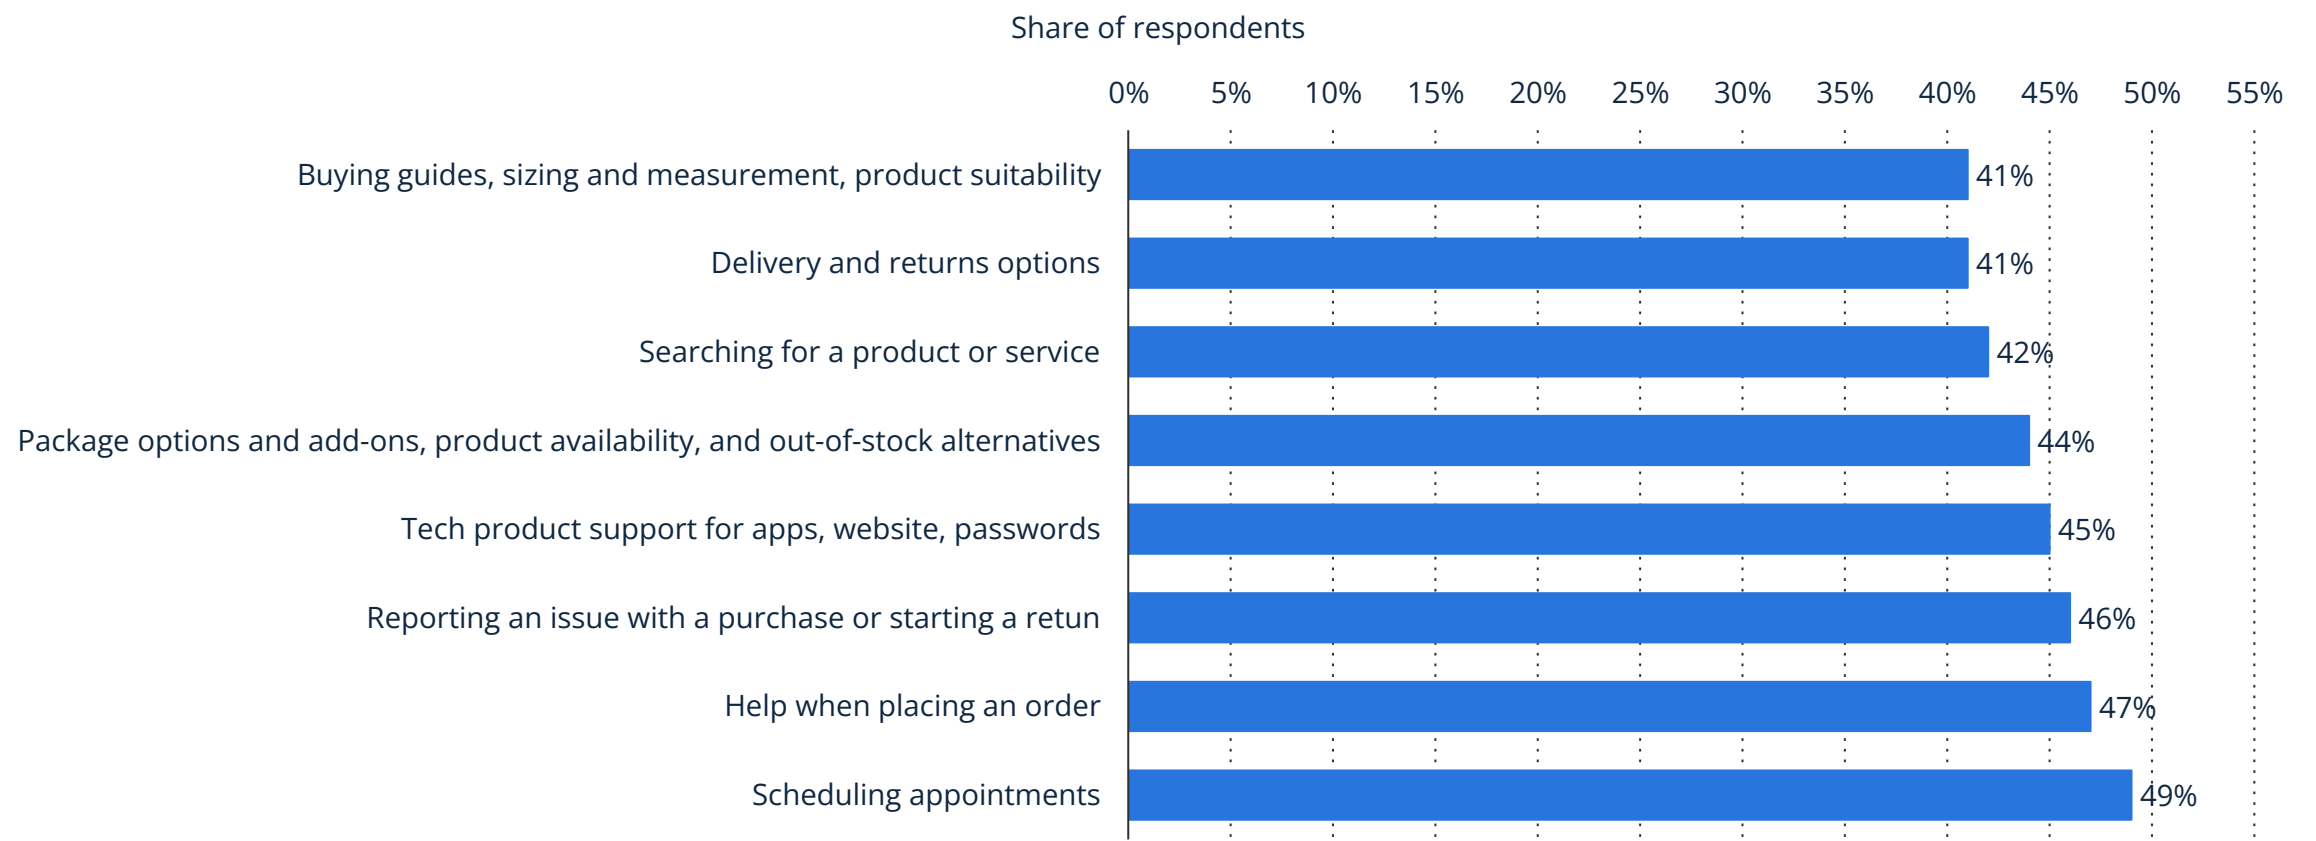

Share of consumers who want generative artificial intelligence (GenAI) to provide personalized recommendations while shopping in 2025

Consumers wanting GenAI to provide hyperpersonalized content in 2025

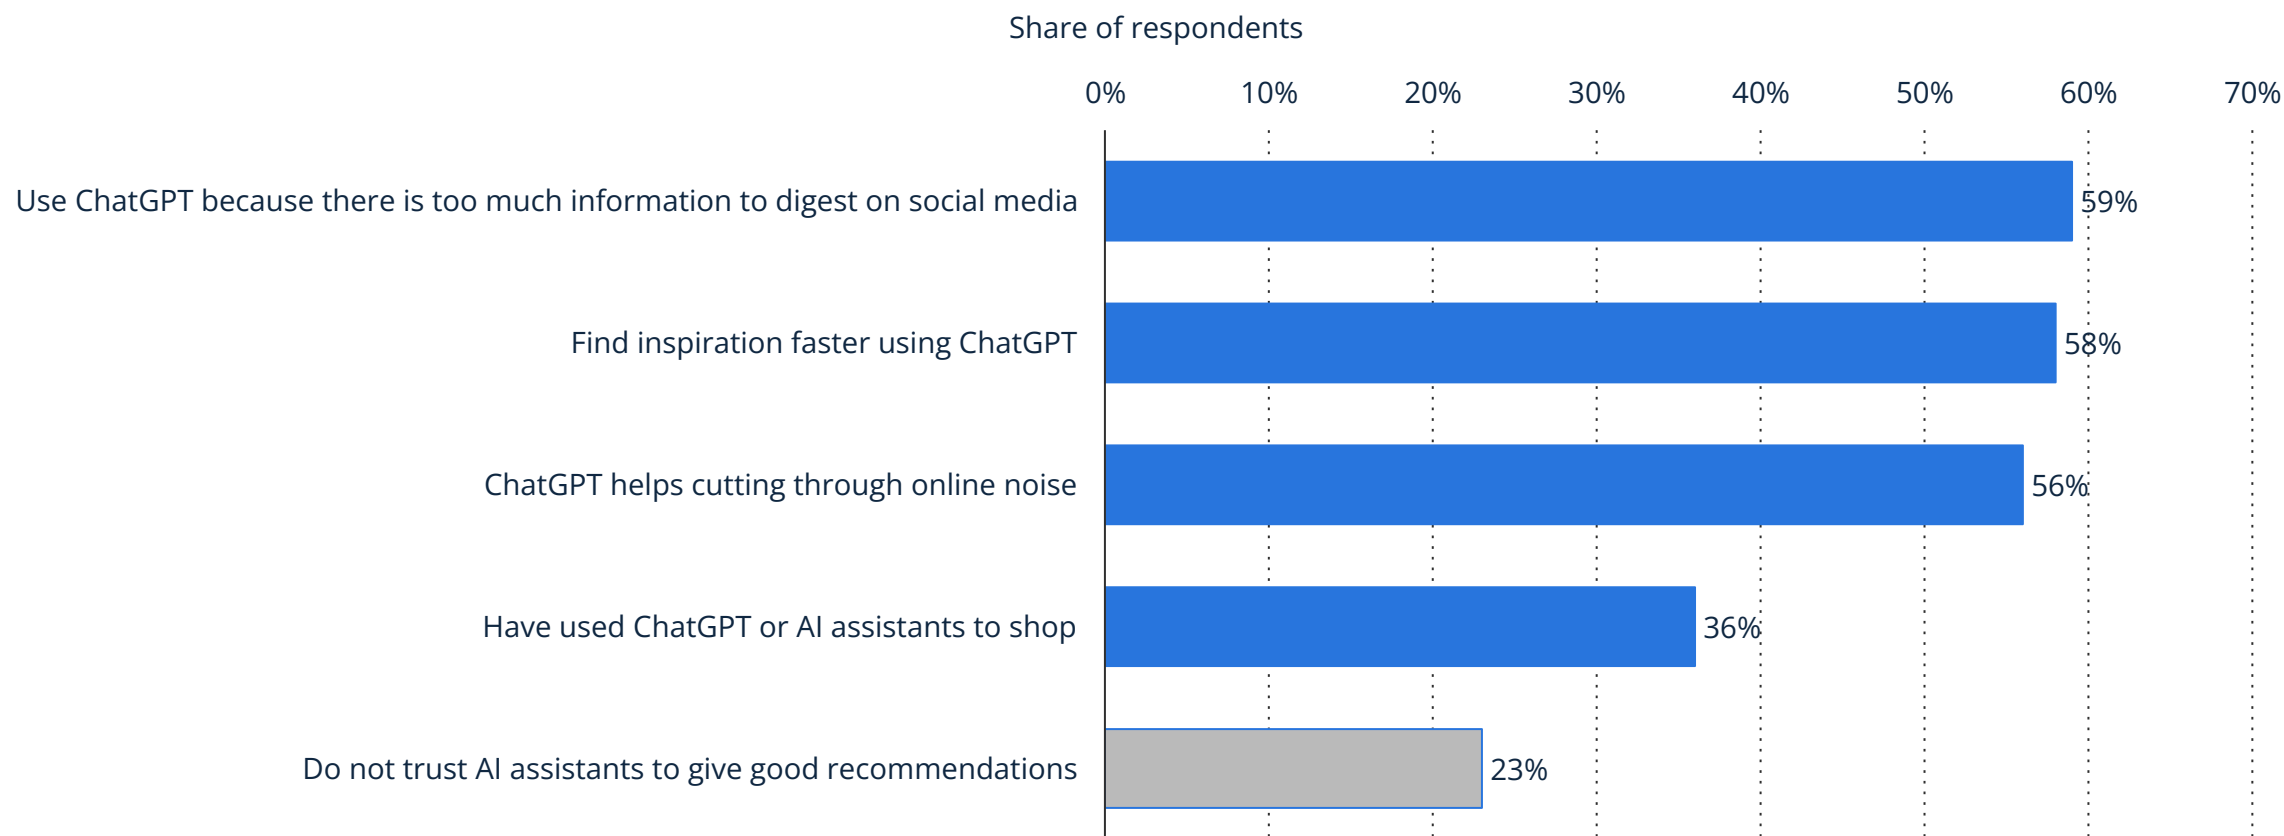

Share of consumers using chatbots when seeking support in 2024, by type of queries

Chatbot queries in e-commerce 2024

Reasons shoppers use ChatGPT for online shopping worldwide in 2025

Main reasons to use ChatGPT when shopping online 2025
